Changes in API

No API key is required to access the given State and Sector APIs

1. State LGD code Retrieval of states

<https://api.cooperatives.gov.in/en/Api/findStateLgCode>

Description

This API provides information about the State.

Provide the `key` and `state` as query parameters to retrieve the relevant data.

API URL

<https://api.cooperatives.gov.in/en/Api/findStateLgCode>

Parameters

- `key`: (string, required) The API key for authorization. The value for the key will be unique to their particular State

- `state`: (integer, required) The State code.

Example: 9 (for Uttar Pradesh)

Success Response

Example of a successful response:

```
{
  "status": "Success",
  "message": [
```

```
{
  "state_code": "9",
  "name": "UTTAR PRADESH",
  "hindi_name": "उत्तर प्रदेश",
  "state_or_ut": "S",
  "sr_no": 9
}]
```

Failed Responses

Examples of failed responses:

```
{
  "status": "Error",
  "message": "API key and State Code are required"
}
```

```
{
  "status": "Failed",
  "Error Message": "State Code is Not Valid"
}
```

2. Sector Code Retrieval API

API URL

<https://api.cooperatives.gov.in/en/Api/findNcdSectorCode>

Description

This API provides information about the Sector.

Provide the `key` and `state` as query parameters to retrieve the relevant data.

Parameters

- `key`: (string, required) The API key for authorization. The value for the key will be unique to their particular State

- `state`: (integer, required) The State code.

Example: 9 (for Uttar Pradesh)

Success Response

Example of a successful response:

```
{
  "status": "Success",
  "message": [
    {
      "id": 1,
      "name": "Primary Agricultural Credit Society (PACS)",
      "hindi_name": "प्राथमिक कृषि ऋण सहकारी संस्था"
    },
  ],
}
```

```
}
```

Failed Responses

Examples of failed responses:

```
{  
  "status": "Error",  
  "message": "API key and State Code are required"  
}  
  
{  
  "status": "Failed",  
  "Error Message": "State Code is Not Valid"  
}
```
